

# US CITIZENS ELECTIONS BILL OF RIGHTS

**We, the Citizen Voters of the United States do hereby proclaim this Elections Bill of Rights to secure the integrity of America's elections,** which are the bedrock of America's constitutional republic; so that our elections are protected from fraud, manipulation, and error, free from foreign interference and influence, enabling the citizens of the United States of America to faithfully give to or withdraw our consent from those who seek to govern our nation, our states, and our local communities, enshrining in the laws of our nation the following principles:

- I. Only US Citizens Participate in US Elections, in Any Manner**
- II. Voter ID For All Votes / Voters: Acceptable ID Confirms Citizenship**
- III. All Vote on Election Day, Except Qualified Absentee Voters**
- IV. Confirm Citizenship, Identity, & Residency of All Voters, Rigorous Voter Roll Maintenance**
- V. Replace All Vulnerable / Insecure Voting Technology; Only Pre-Printed Secure Paper Ballots, Hand-Marked**
- VI. Confirm Accuracy of Election Results Pre-Certification; Require Post Election Independent Audits**
- VII. Ensure Transparency of Elections and Election Records**
- VIII. Protect Deployed Military Voters, Separate from Overseas Civilians**
- IX. Stop Billionaire-Concocted Election Schemes**
- X. Citizen Standing to Enforce Election Laws; Protect Laws from Leftwing Legal Apparatus; Accountability & Penalties for Violations**

Election Integrity Network's National Working Groups comprise individuals, grassroots advocates, and organizations from around the country and are designed to promote election integrity by addressing a specific procedural or policy issue or aspect of the election process. Many participants join the NWG from one of EIN's many statewide election integrity coalitions. Our Zoom-based calls include guests from national organizations, state subject matter experts, an exchange of research and materials, and interactive participation of attendees.

### **Citizens Only in American Politics and Voting**

Citizens Only in American Politics and Voting focuses on preventing non-citizen voting and foreign election interference through stricter eligibility checks. It advocates for policies, state and federal legislation and state constitutional amendments to confirm citizen voter eligibility and to ban foreign money in election administration and state amendments.

### **Voter Eligibility and Voter Rolls**

Voter Eligibility and Voter Rolls aims to enhance ID requirements and clean voter registration lists through ID's that verify personal identity, residency, and U.S. citizenship with additional verification measures used for vote by mail.

### **Election Day, Ballot Security and Voter Protection**

Election Day, Ballot Security and Voter Protections seeks to standardize and secure election procedures including precinct-based in-person voting only with ID on Election Day with no early or same-day registration. Absentee voting to and all ballots to be publicly counted on election night with no curing or deadline extensions.

### **Election Technology and Security**

Election Technology and Security addresses risks in electronic voting systems, advocating for auditable paper trails and supports secure, transparent voting by banning touchscreens and remote access voting, and ensuring systems are open-sourced and publicly tested with manual backups.

### **Protecting Military Voting**

Protecting Military Voting demands secure voting for military voters in the continental U.S. and on overseas posts and voter verification of overseas citizens voting from abroad. It will address necessary changes in law to separate procedures for registration and voting by overseas civilian citizens from the U.S. military.

### **Banning Third-Party Election Interference**

Banning Third-Party Election Interference targets funding by private individuals and organizations seeking to disrupt and create bias in election administration, ballot initiatives and referenda. It opposes Ranked Choice Voting, the National Popular Vote, and works to secure the doctrine of "one voter, one vote."

### **Election Accuracy & Transparency**

Election Accuracy & Transparency promotes open vote counting and independent, full reconciliation post-election audits before certification and opposes self-audits and risk-limiting audits. It also works toward full election transparency, public access to all records, and penalties for withholding or destroying them, and citizen lawsuits to enforce access.
